Career Objective

Data Analyst with hands-on experience building Power BI and Tableau dashboards and SQL-driven analysis on real-world datasets, currently interning at Bluestock Fintech. Skilled in Python, SQL, and Excel for end-to-end analysis — from data cleaning to stakeholder-ready visualizations. Seeking an internship/full-time Data Analyst role to apply my experience at scale.

Skills

Programming & Database: Python, SQL, MySQL

Visualization & BI: Power BI, Tableau, Excel, Matplotlib, Seaborn, Pandas, NumPy

Core Competencies: Data Cleaning & ETL, EDA, Statistical Analysis, Dashboard Development, KPI Reporting

Experience

Data Analyst Intern (Part-time) | Bluestock Fintech

Sep 2026 – Present

- Analyzed 8+ mutual fund industry datasets covering fund performance, NAV history, AUM, category inflows, SIP inflows, folio counts, transactions, benchmarks, and portfolio holdings.
- Cleaned, transformed, and prepared raw datasets using Python, Pandas, and Excel for exploratory and comparative analysis.
- Performed EDA and SQL-based analysis to identify trends in fund performance, investor activity, AUM, inflows, and category-level behavior.
- Created analytical visualizations and Power BI dashboards to communicate financial trends, KPIs, and actionable insights from large datasets.

Projects

Cryptocurrency Market Intelligence Dashboard | Python, API, Power BI

- Developed an automated Python data pipeline using the CoinGecko API to collect live cryptocurrency market data and build a continuously growing historical dataset.
- Analyzed 10,000+ cryptocurrencies across market capitalization, trading volume, price performance, BTC/ETH dominance, and category-level trends.
- Built an interactive Power BI dashboard with KPI cards, performance analysis, top gainers/losers, and category insights for market monitoring.

Hotel Revenue Intelligence & Optimization Platform | Python, SQL, Power BI, Machine Learning

- Analyzed 87,230 hotel booking records using Python and SQL to identify revenue trends, cancellation patterns, booking behaviour, lead time, and operational inefficiencies.
- Performed data cleaning, exploratory analysis, and anomaly detection, identifying 1,745 anomalous records for further investigation.
- Developed a machine-learning demand forecasting model to support data-driven revenue and capacity planning.
- Built an interactive Power BI dashboard with hotel KPIs and analytical views to communicate findings and formulate business recommendations.

Education

B. Tech. Computer Science Engineering (Artificial Intelligence & Machine Learning)

2023 - 2027

Rajarambapu Institute of Technology, Rajaramnagar, Sangli

Minor – New Product Design and Development

Certifications

- | | |
|---|------------|
| • IBM Data Analytics using Python | April 2026 |
| • Deloitte Data Analyst Job Simulation – Forage | April 2026 |
| • Tata GenAI Data Analyst Job Simulation – Forage | May 2026 |

Research & Conference

AI-Driven EV Charging Station Placement

- Presented research paper at the 6th International Conference on Recent Trends in Engineering Technology and Management (ICRETM 2026).
- Paper accepted for upcoming publication and indexing in Google Scholar, as confirmed by the conference.
