Career Objective

Aspiring Data Analyst pursuing B. Tech in CSE (AI & ML) with hands-on experience analyzing 32M+ records and building interactive dashboards. Skilled in Python, SQL, Power BI, Tableau, and translating complex datasets into actionable business insights. Seeking to leverage analytical expertise and proven project success in a Data Analyst role.

Skills

Technical skills:

- **Programming & Database:** Python, SQL, MySQL
- **Visualization & BI:** Power BI, Tableau, Excel, Matplotlib, Seaborn, Pandas, NumPy
- **Core Competencies:** Data Cleaning & ETL, EDA, Statistical Analysis, Dashboard Development, KPI Reporting

Education

B. Tech. Computer Science Engineering (Artificial Intelligence & Machine Learning) **2023 - 2027**

Rajarambapu Institute of Technology, Rajaramnagar, Sangli

Minor – New Product Design and Development

Projects

Customer Retention & Loyalty Analytics Dashboard | Python, SQL, Power BI

- Analyzed 32M+ Instacart order records using Python and advanced SQL (CTEs, window functions) to evaluate retention, reorder behaviour, and product performance.
- Built 3-page Power BI dashboard with KPIs tracking loyalty metrics, repeat purchases, and sales trends

Cloud Kitchen Profitability Analytics Dashboard | SQL, Tableau

- Designed and developed a 2-page interactive Tableau dashboard to analyze cloud kitchen sales, profitability, restaurant performance, menu insights, and operational KPIs using dynamic filters and calculated fields.
- Normalized raw data into a relational SQL database and performed 80+ business SQL analyses to uncover actionable insights on revenue trends, sales channels, brand performance, and operational efficiency.

Supply Chain Performance Analytics Dashboard | Python, SQL, Power BI

- Preprocessed and normalized 10,000+ supply chain records using Python and SQL transformations
- Developed 4-page dashboard with 10+ KPIs analyzing sales, inventory, shipping, and regional insights

Virtual Internships

Deloitte Data Analyst Virtual Internship – Forge **April 2026**

- Performed data cleaning, visualization, and business reporting on simulated real-world datasets

Tata GenAI Data Analyst Virtual Internship – Forge **May 2026**

- Applied AI-driven analytics for business problem-solving and generative AI reporting solutions

Publication

- Research paper titled “AI-Driven EV Charging Station Placement” published in the 6th International Conference on Recent Trends in Engineering Technology and Management (ICRETM 2026) and indexed under Google Scholar through conference proceedings.

Certification

- IBM Data Analytics using Python
