Career Objective

Final-year B.Tech student with strong skills in SQL, Python, Power BI, Tableau, and Excel, seeking a Data Analyst role where I can apply analytical and visualization skills to transform data into actionable business insights and contribute to organizational growth.

Skills

Technical skills:

- Programming & Database:** Python, SQL, MySQL
- Visualization & BI:** Power BI, Tableau, Excel, Matplotlib, Seaborn, Pandas, NumPy
- Core Competencies:** Data Cleaning & ETL, EDA, Statistical Analysis, Dashboard Development, KPI Reporting

Projects

Cryptocurrency Market Intelligence Dashboard | Python, API, Power BI

- Developed an automated data pipeline using the CoinGecko API and Python to fetch live cryptocurrency data and maintain a continuously growing historical dataset.
- Built an interactive Power BI dashboard analyzing 10,000+ cryptocurrencies with KPIs for market cap, trading volume, BTC/ETH dominance, top gainers/losers, and category performance.

Credit Risk & Loan Analytics Dashboard | Python, SQL, Power BI

- Built a 2-page risk analytics dashboard on 113,937 Prosper loan records using a star-schema model and custom DAX measures to surface borrower credit quality and default risk.
- Identified that higher Prosper Ratings correlate with lower estimated losses and improved returns, and mapped regional loan-distribution patterns to support data-driven lending decisions.

Cloud Kitchen Profitability Analytics Dashboard | SQL, Tableau

- Built a 2-page interactive Tableau dashboard to monitor sales, profitability, menu performance, and operational KPIs.
- Normalized raw data into a relational SQL database and performed 80+ business SQL analyses to uncover actionable insights on revenue trends, sales channels, brand performance, and operational efficiency.

Virtual Internships

Deloitte Data Analyst Job Simulation – Forge

April 2026

- Performed data cleaning, visualization, and business reporting on simulated real-world datasets

Tata GenAI Data Analyst Job Simulation – Forge

May 2026

- Applied AI-driven analytics for business problem-solving and generative AI reporting solutions

Education

B. Tech. Computer Science Engineering (Artificial Intelligence & Machine Learning)

2023 - 2027

Rajarambapu Institute of Technology, Rajaramnagar, Sangli

Minor – New Product Design and Development

Publication

- Research paper titled “AI-Driven EV Charging Station Placement” published in the 6th International Conference on Recent Trends in Engineering Technology and Management (ICRETM 2026) and indexed under Google Scholar through conference proceedings.

Certification

- IBM Data Analytics using Python
